Professional Summary

Software Engineer with 3+ years of experience in cloud infrastructure, distributed systems, and full-stack application development. Proven track record leading DevOps initiatives and deployment strategies across Azure and AWS environments. Skilled in Java (Spring Boot), Python, .NET, and Angular. Strong knowledge in database management, CI/CD pipeline setup, automation, and secure API development. Committed to performance, scalability, and collaborative innovation in Agile environments.

Technical Skills

Programming Languages: Java, Python, C#, JavaScript

Cloud Platforms: Microsoft Azure, AWS, GCP

Storage & Databases: Azure SQL, AWS RDS, MySQL, SQL Server, Oracle, Neo4j

Operating Systems: Linux, Windows Server

DevOps & Tools: Git, GitHub, Azure DevOps, Docker, Kubernetes, CI/CD Pipelines

Other Tools: PowerApps, Power BI, SharePoint, Azure CLI

Professional Experience

- Developer II – Software Engineer
UST Global, Kochi, India
Feb 2020 – Present

- Led the DevOps team in managing and maintaining deployments across multiple environments (dev, QA, production) in Azure and AWS.
- Designed and executed detailed implementation plans for new service rollouts and environment setups.
- Built and maintained CI/CD pipelines using Azure DevOps, automating builds, testing, and deployments.
- Migrated databases from on-premises infrastructure to AWS RDS and Azure SQL with full backup and recovery capabilities.
- Created PowerApps applications to streamline internal workflows, integrating with SQL, SharePoint, and Dataverse.
- Automated infrastructure tasks with Python scripts and managed AWS Lambda functions for EC2 control.
- Delivered knowledge graph systems using Neo4j, deployed and managed on AWS EC2 instances.
- Worked in Agile teams, contributing to planning, sprint execution, code reviews, and retrospectives.

Education

Master of Computer Applications (MCA)

Bachelor of Computer Applications (BCA)

Certifications

- AWS Certified Cloud Practitioner (CLF-C01)
- Microsoft Azure AI Fundamentals
- Azure DevOps
- AWS with Gen AI
- Servant Leader Certification
- Building Your First Power BI Report

Projects & Contributions

- DevOps & Deployment Leadership: Headed DevOps efforts for multiple projects, establishing release pipelines, coordinating with stakeholders, and ensuring smooth environment transitions.
- Database Migration Projects: Executed end-to-end migration of complex databases between AWS and Azure platforms.
- Automation & Monitoring: Developed scripts and tools for environment setup and health monitoring, reducing manual intervention and downtime.
- Neo4j Knowledge Graphs: Created semantic data models and deployed graph solutions on cloud infrastructure.

Leadership & Volunteering

- Colours Lead, UST (Feb 2023 – Present)
- Core Team Member – UST Kochi Foundation Day (Jul 2022 – Present)
- Volunteer – Reflections UST Newsletter Creative Team (Jul 2022 – Present)
